

EXHIBIT 34

Forum Communications Company (“Forum”), licensee of WDAY(AM), Fargo, North Dakota, hereby requests an extension of the request for Special Temporary Authority (“STA”) that it requested back in June . *See* BSTA-20110603ABE, granted June 6, 2011.

As reported in the initial STA, severe weather on May 30, 2011 destroyed two of the three towers in WDAY (AM)’s nighttime directional array, including the tower from which WDAY(AM) broadcasts during daytime hours (Tower 2).

After extensive efforts, Forum’s engineers succeeded in returning WDAY(AM) to daytime operation from Tower 1 (ASR No. 1045306) at reduced power. By this request, Forum seeks Special Temporary Authority (“STA”) pursuant to Section 73.1680(a)(1) of the Commission’s rules to operate WDAY(AM) from Tower 1 of its former 3-tower array.

Forum continues to work toward restoring WDAY(AM)’s nighttime operations. Also pursuant to Section 73.1680(a)(1), Forum requests continued STA to operate WDAY(AM) during nighttime hours non-directionally, at no more than 25% of its licensed power level. In the unlikely event that the STA operations cause objectionable interference, Forum will take all reasonable steps to eliminate such interference.
