

Technical Statement
Application for Construction Permit
W215BG 90.9 mHz. Facility ID 92758 Milford, PA
May, 2008

This technical statement is prepared on behalf of WAMC, licensee of W215BG at Milford, PA, Facility ID 92758. Presently, the transmit antenna is located on a tower that has been deemed defective and must be removed. The tower owner just completed construction of a replacement tower adjacent to the defective tower, and migration of existing antennas is in process. It is anticipated the defective tower will be dismantled on May 29, 2008, therefore expedited processing of this application is respectfully requested.

This application for a minor change in facilities specifies the following changes: (a) new coordinates of the replacement tower structure and (b) new antenna elevation above ground level. The same transmit antenna will be utilized on the new tower. There is no change in power or channel. An Interference Study was performed to confirm there continues to be no contour overlap conditions, and is contained within this application. Further, this application specifies co-owned non-commercial WOSR, Middletown, NY, Facility ID 70848 as the Primary Station.

The center of radiation elevation is compliant with 74.1235 pertaining to Power Limitations as the proposed Effective Radiated Power will not exceed 10 watts.
