Re: Absecon Blvd., City Island Block 840 Lot 1 Antenna

Dear Mike:

We have completed our measurement of the WAYV Antenna and find the new antenna, including all bays, are well within a $\frac{1}{2}$ degree tolerance of a 286degree line, true meridian.

We accomplished this by setting a range across Beach Thorofare prior to the installation of the antenna. Upon completion of the work, we returned to the site and shot a reverse back to the antenna and found it to be on or nearly on the 286degree line. We then made additional checks across the meadow for verification.

Sincerely,

Robert J. Catalano
