

GERALD G. BENAVIDES  
TL KTXU-LP - West Lake Hills, TX

EXHIBIT 6  
Engineering Statement

The applicant is authorized, under File No. BMPTTL-20030606AAG, to construct TL KTXU-LP on Channel 47+ at a site near West Lake Hills, TX. That tower having become unavailable, it is now proposed to relocate the station to a new site, making commensurate changes to the engineering parameters. The attached map of Exhibit 6A indicates the degree of overlap between the authorized and proposed 74 dB $\mu$  service contours.

A review of all available records shown in attached Exhibit 6B indicates that interference might occur with regard to various facilities. In the case of KNCT-DT (Fac ID 9754), attention is directed to the fact that its DTV assignment has been changed from Channel 47 to Channel 38. In all other cases, analyses per O.E.T. Bulletin No. 69 indicate that population loss to any of these requiring protection would be less than 0.5%.
