

EXHIBIT 28 Section III Engineering KOAI (FM) Ch 262
--

Infinity KOAI - FM, Inc. (here-in Infinity), the licensee of KOAI (FM), proposes to move the transmitting antenna location of KOAI (FM). The Licensee proposes to use an omni directional antenna, 30 kW average radiated power at 430 meters antenna radiation center height above ground, Coordinates NAD 27 -32-32- 35.5 N, 096-57-32.0 W.

The proposed transmitter site is short-spaced to KRVF-FM, Ch 295C3. KRVF-FM is third channel adjacent to KOAI (FM). The proposed KOAI (FM) Site will be 73.44 kilometers from the site authorized for KRVF-FM. This is 2.6 Kilometers short of the spacing minimum of 76 Kilometers.

KRVF (FM) is operating under a construction permit file number BPH-20020930ABW. KRVF (FM) has filed an application to cover this construction permit, file number BLH-20030113ACP.

Since the proposed site is short spaced to KRVF-FM under C.F.R. 47 §73.207, the applicant requests that this application be processed under C.F.R. 47 §73.215 as the proposed site does meet the spacing and contour overlap criteria in §73.215. The minimum spacing is 70 km and KOAI (FM) will be 73.44km

The KOAI (FM) contour does not overlap the KRVF-FM contour as a directional antenna is proposed. The protection of the KRVF-FM 60dBu (50/50) contour by the Proposed KOAI (FM) 100 dBu (50/10) contour can be seen in Contour Diagram #1.

Spacing studies 1, and 2 show the 73.207, 73.215 spacing of any potentially affected existing Stations, Allocations or Construction Permits
