

STA Extension Request for KKEN, Duncan, Oklahoma (FAC: 17729)

Mollman Media, Inc., licensee of KKEN(FM), Duncan, Oklahoma requests an extension of its current STA. The KKEN antenna system is not resonant at its current frequency. After changing transmitters to the new Elenos solid state transmitter, it became apparent the reflected power was more than the new transmitter would tolerate. The licensee is currently operating at 3000 watts TPO of the 5100 watts KKEN is authorized for. The licensee respectfully requests an extension of its current STA while the mistuned antenna issue can be addressed.
