Re: Black Media Works, Inc.
WJFP(FM), Fort Pierce, Florida
Facility Identification Number: 5488
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed December 10, 2009, on behalf of Black Media Works, Inc. ("BMW"). BMW requests further extension of the special temporary authority ("STA") granted on March 27, 2008, to operate Station WJFP with temporary facilities.¹

In support of the request, BMW states that it holds Construction Permit BPED-19990727IA, to relocate the transmitter site; however, the facilities authorized by the permit cannot be constructed until an existing analog TV transmitting antenna is removed from the site after the DTV transition. BMW seeks STA for operation from the permit site with reduced power and antenna height.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ WJFP is licensed for operation on Channel 216A (91.1 MHz) with effective radiated power ("ERP") of 6 kilowatts (H&V) and antenna height above average terrain ("HAAT") of 48 meters. Construction Permit BPED-19990727IA authorizes relocation of the transmitter, an upgrade to Class C1, and operation with ERP of 100 kW (Max-DA, H&V) and HAAT of 125 meters.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WJFP may continue to operate with the following facilities:

Geographic coordinates:	27° 26' 7" N, 80° 21' 41" W (NAD 1927)
Channel	216 (91.1 MHz)
Effective radiated power:	0.75 kilowatt (H&V)
Antenna height:	
above ground:	116 meters
above mean sea level:	121 meters
Above average terrain:	119 meters

BMWI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **June 18, 2010**.

Sincerely,

Charles N. Miller, Engineer
