

**December 2008  
KSAS-FM Channel 278C  
Caldwell, ID  
Allocation Study**

Per the Report and Order in MB Docket No. 06-72, KSAS-FM has been ordered to file an application to modify its facilities from Channel 277C to Channel 278C at Caldwell. The attached spacing study shows that the proposed operation meets the co-channel and adjacent channel spacing requirements for Class C stations as prescribed in §73.207 of the Commission's Rules.

While the spacing study indicates a 103 kilometer short-spacing to the licensed facility of KSKI-FM on Channel 279C at Sun Valley, that station has been ordered to Channel 233C0 by the same Commission decision which compels the filing of the instant application. The short-spacing to KSKI-FM, therefore, is not an impediment to grant of the instant application.
