FCC Installation Statement

I, Fred Pace certify that the WKSL FM Directional Antenna System was correctly installed as called for under the F.C.C. Construction Permit # BPH-20051003BFZ

I was present and observed the unpacking, assembly and erection of the Dielectric DCRM six section, full wavelength spaced antenna per directions provided by the Dielectric Corporation. The antenna was orientated and the supplied reflector parasitic elements were assembled per the sketches and instructions provided by the manufacturer.

I also observed the professional survey work establishing the alignment markers that were used to initially orientate the antenna in the correct azimuth direction, and subsequently the survey work done to check the azimuth of the completed antenna.

An affidavit from the licensed surveyor, Elingburg Land Survey Co, is attached certifying that the antenna is orientated at the azimuth specified by the Dielectric Corporation's installation Drawings and derived from the proof of performance for this antenna's directional pattern as mounted as specified on this tower.

I also state that I hold more than 22 Years experience in the field of Broadcast Engineering and I have been continuously employed to build and maintain transmitting facilities for the past 19 years.

Thank You,
