Re: Radio Vision Cristiana Subsidiary Corp.
KCKN(AM), Roswell, New Mexico
Facility Identification Number: 57721
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed March 20, 2013, on behalf of Radio Vision Cristiana Subsidiary Corp. ("RVC"). RVC requests special temporary authority ("STA") to operate with its licensed antenna system at reduced power during daytime and nighttime hours.¹ In support of the request, RVC states the station has been operating at reduced daytime and nighttime power of 10 kilowatts, instead of 50 kilowatts, using its auxiliary transmitter because its 50 kilowatt main transmitter is damaged.

Section 73.1560(d), which governs reduced power operation, states:

In the event it becomes technically impossible to operate at authorized power, a broadcast station may operate at reduced power for a period of not more than 30 days without specific authority from the FCC. If operation at reduced power will exceed 10 consecutive days, notification must be made to the FCC in Washington, DC, Attention: Audio Division (radio) or Video Division (television), Media Bureau, not later than the 10th day of the lower power operation. In the event that normal power is restored within the 30 day period, the licensee must notify the FCC of the date that normal operation was restored. If causes beyond the control of the licensee prevent restoration of the authorized power within 30 days, a request for Special Temporary Authority (see Section 73.1635) must be made to the FCC in Washington, DC for additional time as may be necessary.

Accordingly, the request for STA IS HEREBY GRANTED. Station KCKN(AM) may continue to operate with reduced power both daytime and nighttime. It will be necessary to further reduce power or cease operation if complaints of interference are received. RVC must notify the Commission when licensed operation is restored.² RVC must use whatever means are necessary

¹ KCKN(AM) is licensed for operation on 1020 kHz with 50 kilowatts daytime and nighttime, employing different directional antenna patterns (DA-2-U).

² See 47 CFR §§ 73.45(c), 73.51, 73.61(b).

to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **September 18, 2013**. However, in light of the lapse of time between December 15, 2012 and the filing of the instant request, the authority granted will not cover the period between 31 days after reduced operation began and the filing of the instant request.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Jerome J. Manarchuck
