

Exhibit 3
Conditions of Resumption of Operation
WXVA, Winchester, VA
June 2011

On June 15, 2011 WXVA resumed operations using the facilities authorized in BSTA-20110330AAP, and with daytime facilities as substantially described in construction permit BP-20110131AQW.

Pending completion of the ground system, the day facilities are being operated under authority of FCC Rules and Regulations section 73.1615(a)(2) at 390 Watts, which provides a slightly smaller coverage area than the licensed facility. It is expected that the ground system will be complete and a license application to cover BP-20110131AQW will be filed before the specified 30 day period expires.

The night facilities are as described in BSTA-20110330AAP.

The station is operating with new main studio facilities located at 2047 Valley Avenue, Suite 200, Winchester, VA 22601. This location is within the WXVA principal community, and thereby complies with the requirements of FCC Rules Section 73.1125(a)(1). The station is operating with a full staff.
