EXHIBIT A

Allocation Reference Site

This application seeks to upgrade KGEE to Channel 247C1 at Pecos, Texas. As denoted on Exhibit A1, from the proposed allocation reference site, Channel 247C1 meets the Commission's minimum distance separation requirements to all licensed, proposed or applied for facilities, with the exception of the existing KGEE Class A facility.

From the proposed allocation reference site, a maximum Class C1 facility would place a theoretical 70 dBu (non-terrain impacted) signal over 100% of the community of Pecos, Texas, as shown on Exhibit A2. Further, there is a tower located at the allocation site and, therefore, the site is suitable for tower construction. Therefore, this proposal meets the Commission's allocation criteria.
