

## **EXHIBIT 1**

### Engineering Exhibit

By this application, Cox Radio, Inc., licensee of WEDR(FM), Miami, Florida, proposes to cover its construction permit correcting the geographic coordinates for the WEDR(FM) main antenna (BPH-20000329AAR). This correction is necessary due to a recent survey of the WEDR(FM) antenna site. The survey, which was conducted in connection with the antenna structure registration process, revealed that coordinates for the tower site are slightly different from what was recorded based on earlier methods of measurement.

The license for WEDR(FM) (BLH-19900430KA) contains the following coordinates:

25° 57' 59" North Latitude  
80° 12' 33" West Longitude

The correct coordinates and the coordinates listed on the FCC Antenna Structure Registration (Registration No. 1028046) are as follows:

25° 58' 03" North Latitude  
80° 12' 34" West Longitude

All geographic coordinates are based on the 1927 North American Datum.
