

### PURPOSE EXHIBIT

A recent review of the station files for WRAL-FM, Raleigh, North Carolina, failed to show a license to cover the construction authorized by the grant of application BPH-19910717IK, on November 29, 1991. The authorized construction was completed as provided for in the construction permit. However, through apparent inadvertence, technical personnel at the time of completion of construction must have overlooked the filing of an application to license the constructed facility. The purpose of this application is to correct the recently discovered error and to properly license this facility.
