

EXHIBIT 7

Response to question 6 Section III of K59GC 347

Prepared by Guy Smith in connection with License
application of K59GC on Channel 44(-) at Plainview, Tx.

The station was constructed entirely in accordance with all the terms and conditions of the Construction Permit with the exception of the Effective Radiated Power (ERP) (Question 6 of Section III). All other terms, conditions, restrictions and specifications of the Construction Permit have been met.

The ERP of K59GC (K44GL) is 9.6kW instead of 20.8kW as specified in the Construction Permit. A Form 346 is being filed with this application.
