**September 2005**

**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Miller Communications, Inc. ("Miller"), licensee of FM radio station WWBD, Channel 239C3, Bamberg, South Carolina. Miller has an outstanding permit to make minor changes in the facilities of WWBD (BPH-20031031ADP, as modified in BMPH-20040429AAY). Miller herein submits a license application to cover the outstanding permit. Miller is operating WWBD under automatic program test authority. A calculation of the transmitter power output of the WWBD transmitter is attached as Exhibit A.

There are two operating conditions on the WWBD permit. The first is that WWBD is operating according to the contour protection limits of §73.215, which Miller recognizes. The second condition notes that the power of WWBD must be reduced or operation ceased, as needed, to insure that persons with access to the tower will not be exposed to radio frequency radiation levels in excess of the Commission's guidelines. Miller will comply with this requirement. Based on the foregoing, it is believed that WWBD is operating in compliance with the Commission's rules.
