TECHNICAL NARRATIVE IN SUPPORT OF CITY OF LICENSE CHANGE
ON BEHALF OF GOIS BROADCASTING BOSTON, LLC
FOR WLLH 1400 KILOHERTZ
LAWRENCE, MASSACHUSETTS

NOVEMBER 2016

APPENDIX TO ENGINEERING REPORT COVERING
REQUEST FOR CONSTRUCTION PERMIT
TECHNICAL NARRATIVE IN SUPPORT OF CITY OF LICENSE CHANGE
ON BEHALF OF GOIS BROADCASTING BOSTON, LLC
FOR WLLH 1400 KILOHERTZ
LAWRENCE, MASSACHUSETTS

STATEMENT

This technical narrative and accompanying engineering exhibits have been prepared on behalf of Gois Broadcasting Boston, LLC, hereinafter referred to as “Gois”, licensee of station WLLH Lowell, Massachusetts, in support of an application for construction permit. The minor modification application includes a request to change city of license from Lowell, Massachusetts to Lawrence, Massachusetts. This proposal is classified an intra-urban move as defined in *Rural Radio*¹, since Lowell² and Lawrence³ are located in the Boston Urbanized Area.

¹ See *Policies to Promote Rural Radio Service and to Streamline Allotment and Assignment Procedures*, Second Report and Order, First Order on Reconsideration, and Second Further Notice of Proposed Rulemaking, 26 FCC Rcd 2556 (2011) (“*Rural Radio*”) and Second Order on Reconsideration, adopted October 11, 2012 (“*Second Order on Recon*”).

² Population 108,866, source 2013 US Census estimate

³ Population 78,197, source 2014 US Census estimate

Due to the short distance between the licensed and proposed transmitter sites, it can be safely concluded the facilities specified in the instant modification are mutually exclusive with the WLLH licensed facilities⁴. Therefore, this application qualifies for a city of license change and the modification is appropriately requested as a minor modification application. See 47 C.F.R. Section 73.3571(j).

⁴ The distance between transmitter sites is 13.7 kilometers.

TABLE OF EXHIBITS ACCOMPANYING THIS NARRATIVE

FIGURE 3A	Map of Protected FM Service to Existing Community of License
FIGURE 4A	Map of City Grade Service to Proposed Community of License
TABLE 1A	Table of AM Stations Providing Service to Existing Community of License
TABLE 2A	Table of FM Stations Providing Service to Existing Community of License

AREA AND POPULATION DATA

The 2 mV/m contour population associated with this proposal provides service to 245,724 persons within a land area of 356.5 square kilometers, while the licensed 2 mV/m contour provides service to 236,024 persons within a land area of 368.0 square kilometers. Figure 1A provides a mapping of the 2 mV/m contours.

The proposed population gain is 227,975 persons and the proposed land area gain is 289.1 square kilometers. The proposed population loss is 218,275 persons and the proposed land area loss is 300.6 square kilometers. Overall, there is a net population gain of 9,700 persons and net area loss of 11.5 square kilometers within the proposed 2 mV/m contour. All population counts and area computations are within the Boston Urbanized Area.

EXISTING SERVICE

There are 36 stations, 11 AM and 25 FM, excluding WLLH, that provide service to Lowell⁵. It is obvious by looking at Figures 2A and 3A that the 2 mV/m contour loss area will continue to be well served by numerous other aural services. The proposal to relocate to Lawrence will provide Lawrence with its third local service and not result in the creation of any “white” or “grey” service area. (The service count is based on stations which provide service to at least 80 percent of the area of Lawrence. As per FCC rules,

⁵ See Figures 2A and 3A, Tables 1A and 2A.

service for AM facilities is the daytime 2 mv/m contour, and for FM facilities, the 60 dbu contour except for Class B and B1 facilities, which are respectively the 54 and 57 dbu contours.)

COMPLIANCE WITH FCC RULES

Operation from the proposed transmitter site must provide the requisite city grade 5 mV/m service to 100% of Lawrence as per Section 73.24(i) of the rules. Figure 4A is a map of the city grade service area. The proposed operation would provide 5 mV/m service to 100% of Lawrence.

METHODOLOGY

The AM predicted coverage contours were calculated in accordance with the provisions of 47 C.F.R. Section 73.182. The FM predicted coverage contours were calculated in accordance with the provisions of 47 C.F.R. Section 73.313.

The population within the service contours was calculated using a computer program that utilizes the 2010 U.S. Census database of "population centroids." The program adds the populations of those U.S. Census designated areas whose centroid lies within each service area. Land areas were calculated using a root mean square algorithm.

CONCLUSION

Granting the request to reassign WLLH to the community of Lawrence would provide an overall preferential arrangement of allotments that would serve the public interest. Lawrence will receive its third local service⁶ and the community of Lowell will continue to have three local services⁷ in addition to copious service from the 36 stations that provide protected service to Lowell⁸. All of the loss areas would continue to be well-served by five or more aural reception services⁹. Therefore, Gois requests a construction permit for WLLH to specify Lawrence, Massachusetts as the community of license, in lieu of Lowell, Massachusetts and to authorize the other technical changes requested in this application.

⁶ Stations WNNW(AM) and WEEI-FM are licensed to Lawrence.

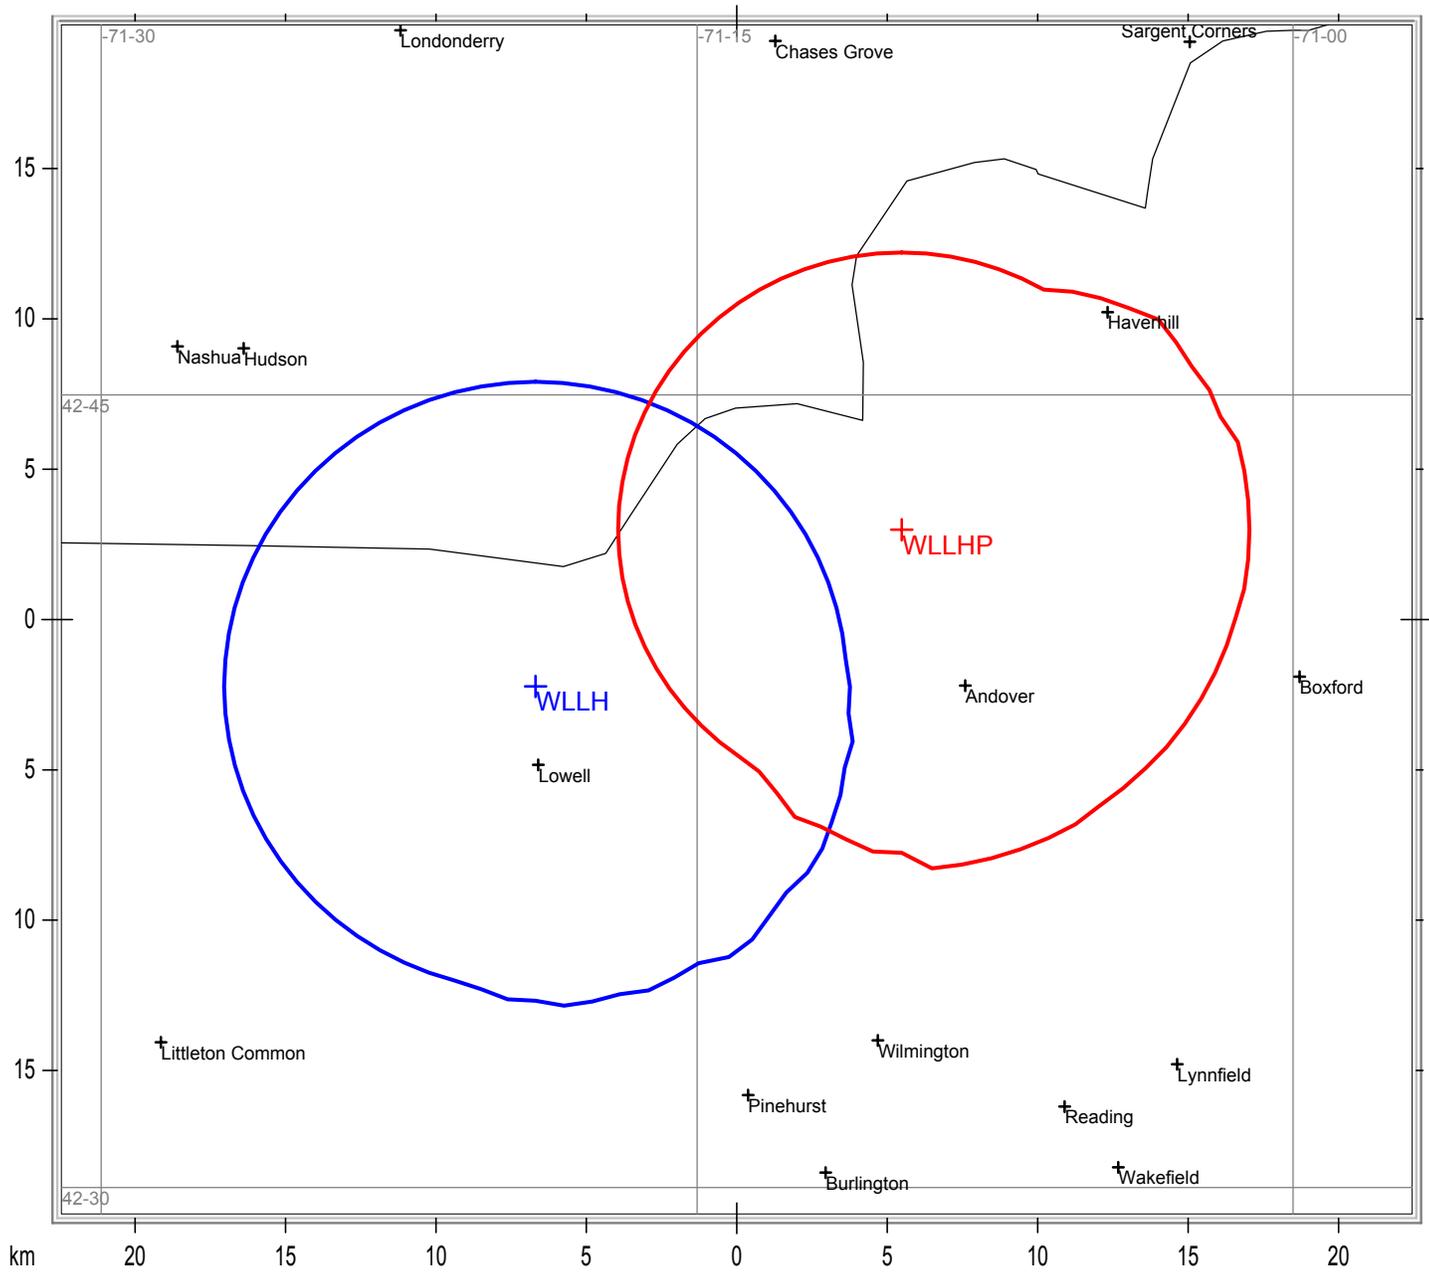

⁷ Stations WCAP(AM), WUML(FM) and WCRB(FM) are licensed to Lowell.

⁸ See Figures 2A and 3A, Tables 1A and 2A.

⁹ Based on Figures 2A and 3A, it can be safely concluded that in excess of ten stations provide service to the loss areas.
