

J.B. SALAZAR
TL K59EY - Uvalde, TX

EXHIBIT 6
Engineering Statement

The applicant is presently authorized, under File No. BLTT-19930930JC, to operate the reference station at Uvalde, Texas, on out-of-core Channel 59. It is now proposed to relocate the facility to a site near Knippa, Texas, changing to (permanent) Channel 42 and also increasing effective radiated power. The attached Exhibit 6A indicates the degree of overlap between the authorized and proposed 74 dBu service areas.

As shown in attached Exhibit 6B, this proposal is not predicted to cause objectionable interference to any other facility.
