**May 2015**

**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Cumulus Licensing, LLC (“Cumulus”), licensee of radio station WGLF (FM), Channel 281C0, Tallahassee, Florida. Cumulus is filing this application for station license to cover the outstanding construction permit (BXPB-20150327AAM) for an auxiliary facility. The detailed calculation of the transmitter power output for WGLF is attached as Exhibit A.

The outstanding construction permit has a single special operating condition or restriction. This condition states:

*“The permittee/licensee in coordination with other users of the site must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.”*

Cumulus is aware of its responsibility in this matter.

Based on the foregoing, it is believed that Cumulus Licensing LLC is in compliance with the Commission’s rules and requests to operate the WGLF auxiliary antenna at 4.0 kilowatts.
