

**MINOR CHANGE APPLICATION/
CUMULUS LICENSING LLC
WFAS-FM RADIO STATION
CH 280A - 103.9 MHZ - 0.98W
BRONXVILLE, NEW YORK
November 2007**

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Cumulus Licensing LLC ("Cumulus"), licensee of station WFAS-FM, Channel 280A, Bronxville, New York. Cumulus herein proposes to make minor changes in the facilities of WFAS-FM by relocating the station to another site, increasing effective radiated power and lowering the antenna height above average terrain.

Cumulus is proposing to implement this change at an existing building/tower site. As such, the Federal Aviation Administration was not apprised of this proposal. The structure has been registered with the Commission and assigned Antenna Structure Registration Number 1247379. WFAS-FM is a pre-1964 grandfathered shortspaced station. As such, a review of the impact of the relocation of WFAS-FM on the stations with which WFAS-FM has a grandfathered relationship is attached as Exhibit A.

Due to the co-location of WFAS-FM with another FM station located atop a building, it was not possible to use the worksheet associated with Form 301 to demonstrate compliance with the FCC radio frequency radiation exposure rules. Therefore, attached as Exhibit B is a study

which shows this proposal complies with the RF exposure limits. The WFAS-FM antenna will be mounted above the existing WFUV directional antenna system. Cumulus will provide a letter from the manufacturer of the WFUV antenna showing that the WFAS-FM antenna and associated feedline will not impact the WFUV directional antenna pattern. All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to Cumulus and is available to the Commission upon request.¹

1) The undersigned has evaluated only the radio frequency radiation exposure portion of the environmental review. All other necessary reviews have been or will be addressed by the applicant.
