

Technical Statement
Application for Construction Permit
W293AE 106.5 mHz. Newburgh, NY
January, 2009

This technical statement is prepared by Charles Williamson, president of Digital Radio Broadcasting, Inc., licensee of W293A at Newburgh, NY. This application serves three purposes: (1) Specify a different transmitter site,(2) specify a different power level and (3) specify a directional antenna.

It is proposed to relocate the translator facility to an established remote mountaintop communications site. The elevation is compliant with 74.1235 pertaining to Power Limitations since the maximum Effective Radiated Power will not exceed 10 watts.

The proposed facility will be subject to and from overlap with regard to another application that was filed during the 2003 window. This application was contained within a mutually exclusive group and has not been processed. Further discussion and a waiver request is contained at Exhibit 12.
