Attachment to Minor Change Application  
FCC Form 318

**Statement of Date of Original Articles of Incorporation:**

Rootswork Inc. was originally granted a certificate of incorporation by the State of Vermont on April 17<sup>th</sup>, 1996

**Exhibit 2 Description**

Rootswork's educational and outreach programs are greatly enhanced by our LPFM station.

Rootswork Inc. is an organization devoted to protecting, promoting and nurturing agriculture, and community in the Mad River Valley. Our mission is to promote and foster activities that will help maintain a sustainable and vibrant community by making spaces for community to happen. One very important 'community space' that we have created is WMRW-lp, Warren, a free format FM radio station that is open to the on-air participation of all members of our Mad River Valley community. We have been on the air since November of 2004 and currently have over 40 local programmers who do weekly shows, educating and informing their neighbors through this local community radio station. This proposed minor change in frequency and tower location will help Rootswork reach more people in our community and therefore extend and strengthen the impact of our educational and outreach programs thereby furthering our mission.
