Re: Broadcast antenna orientation
Ainger Hill, Westport, New York
BPLS Project #NYWPRT01

To whom it may concern;

On July 18, 2005, Button Professional Land Surveyors, P.C., assisted with the orientation of the WXAL FM broadcast antenna on the tower at Ainger Hill in Westport, New York.

I attest that the orientation of this antenna is within one degree of 285° True North Azimuth, as instructed.

Very truly yours,

Vaughn C. Button, L.S.
