

TECHNICAL STATEMENT

RADIO MULTIPLE OWNERSHIP ANALYSIS

We propose to correct the geographic coordinates of WOLZ (FM) Fort Myers, Florida. A multiple ownership analysis was prepared considering radio stations under present or proposed common ownership, time brokerage or joint sales.

Metro Market Study

In this application, we are proposing to correct by 150 meters the antenna location of Station WOLZ (FM) Callahan, Florida. The community of license, Callahan, Florida, is in Lee County, which is part of the Ft. Myers-Naples-Marco Island, FL Metro and thus WOLZ (FM) is geographically located in this Metro. WOLZ (FM) is designated "home" to the Ft. Myers-Naples-Marco Island, FL radio Metro; the number of stations owned by us in the Metro is not changing by this application. Stations in the metro are given in **Figure 1**.

According to the FCC's local ownership "tiers," in a Metro reported by BIA as having 30 or more, and 44 and fewer commercial and noncommercial educational full-power radio stations, a party may have a cognizable interest in up to 7 commercial full-power radio stations, not more than 4 of which are in the same service(AM or FM). This application complies with the multiple ownership rules because only 4 of 39 full-power radio stations (4 FM) will be attributable to us.

Interim Contour-Overlap Analysis

Because an overlapping stations community of license is located outside any Arbitron Metro, an interim contour-overlap analysis is also set forth in this statement.

Interim Contour-Based Radio Markets

A "radio market" under the interim contour-overlap method is the area encompassed by the mutually overlapping principal community contours of the stations under common-ownership or attribution. Here, such mutually overlapping contours form three (3) "radio markets" for interim contour-overlap analysis under the Commission's rules as shown below in **Table 1**.

Table 1, Table of Contour Markets

| Market 1 | | Market 2 | | Market 3 | |
|-----------|----|-----------|----|----------|----|
| 3-FM 3-AM | | 4-FM 2-AM | | 5-FM | |
| WZJZ | FM | WOLZ | FM | WOLZ | FM |
| WCVU | FM | WZJZ | FM | WBTT | FM |
| WIKX | FM | WCVU | FM | WCKT | FM |
| WCCF | AM | WIKX | FM | WZJZ | FM |
| WKII | AM | WKII | AM | WIKX | FM |
| WDDV | AM | WDDV | AM | | |

Count of Stations in Defined Markets

The number of radio stations in a contour-overlap "radio market" is determined by counting the operating stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject commonly owned or attributable stations, excluding any stations whose transmitter sites are further than 92 kilometers from the perimeter of mutual overlap, and excluding any commonly owned or attributable stations that do not serve to define the market.

In the interim contour-overlap "radio markets" studied herein, there are the required count of radio stations, including the subject co-owned stations, which overlap or intersect with the defined "radio market." **Figure 2** through **Figure 8** are maps and tabulations of the radio stations identified in the contour-overlap "radio market", and **Table 2** is a summary of that data.

Table 2, Table of Market Station Count

| Market 1 | | Market 2 | | Market 3 | |
|----------|----|----------|----|----------|----|
| Count | 40 | Count | 41 | Count | 46 |

Only known licensed, operating radio stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 45 degrees of azimuth.

Conclusions

In the Metro market studied herein, there are at least 39 radio stations, including the subject commonly-owned 4-

FM stations, which are home to the Metro. This proposal does not affect the existing number of commonly-owned stations in the subject Metro.

In each interim contour-overlap "radio markets" studied herein, there is at least the minimum required count, including the commonly-owned stations.

Based on the above, it is concluded that the proposed modification complies with Section 73.3555(a) of the FCC Rules.

Respectfully submitted,

Troy G. Langham
FCC Engineering Supervisor
17 July 2017
