5670 Wilshire Blvd..
Los Angeles, CA 90036

Ref: BXPB-20070809AAV
KRTH Los Angeles, California

Dear Mr. Duke,

Thank you for the technical brief and site drawing showing the location of your proposed auxiliary transmitting antenna and the location of the existing antenna installation of translator station K212FA.

As you indicate in your site drawing, the existing K212FA antenna installation is on a completely different structure and nowhere in the same aperture as your proposed installation.

Based on this diagram, I feel there will be no detectable effect on the directional characteristic of the K212FA antenna installation.

This opinion carries no performance guarantee and is based solely on the data provided by CBC Radio KRTH and the practical experience of our sales engineers. It is by no means a comprehensive analysis and Kathrein-Scala recommends KRTH to engage the services of a qualified communications consulting firm for a definitive evaluation. The furnished data has not been verified by Kathrein-Scala for completeness or accuracy.

If we may be of further assistance, please do not hesitate to contact us.

Best regards,

Michael Wm. Bach, Sales Engineer
