

**STATEMENT OF WILLIAM J. GETZ  
IN SUPPORT OF AN  
APPLICATION FOR LICENSE AND  
REQUEST FOR PROGRAM TEST AUTHORITY  
WURK(FM) - ELWOOD, INDIANA  
CHANNEL 269A, 6.0 kW (DA-MAX), 100 m HAAT**

Prepared for: Backyard Broadcasting Indiana Licensee, LLC

I am a Radio Engineer, an employee in the firm of Carl T. Jones Corporation with offices located in Springfield, Indiana. My education and experience are a matter of record with the Federal Communications Commission.

This office has been authorized by Backyard Broadcasting Indiana Licensee, LLC, to prepare this statement and Section III of FCC Form 302-FM in support of an Application for License and Request for Program Test Authority for WURK(FM), Elwood, Indiana. The license is to cover the WURK(FM) outstanding Construction Permit (FCC File No. BPH-20050302ADT). The applicant has completed construction in conformance with the Construction Permit. This statement sets forth technical details of the installation of the WURK(FM) antenna system.

A new, six-level, one-half wavelength spaced, directional transmitting antenna, manufactured by Electronics Research, Inc. ("ERI"), has been installed on the existing support structure as authorized in the WURK(FM) outstanding Construction Permit. Technical data describing the antenna system and the installation is set forth in the attached Section III of

STATEMENT OF WILLIAM J. GETZ  
PAGE 2

FCC Form 302-FM and the attached Directional Antenna Proof of Performance prepared by ERI.

The antenna was installed in accordance with the manufacturer's instructions and specifications. The proper installation and orientation of the directional antenna was confirmed by a licensed surveyor and engineer (see attached certifications).

The attached proof of performance demonstrates that the measured horizontal plane radiation pattern is within the FCC-specified maximums included as a special operating condition of the WURK(FM) Construction Permit. In addition, the required vertical plane radiation pattern is included as Figure 3 in the manufacturer's proof of performance.

It is submitted that the WURK(FM) antenna system has been constructed in the manner authorized under BPH-20050302ADT and that Program Test Authority should be granted and a license should be subsequently issued for permanent operation of the facility.

This statement and Section III of FCC Form 302-FM were prepared by me, or under my direct supervision, and are believed to be true and correct.

DATED: December 14, 2005
