### **Proposed Change**

The proposed facility change in this application is the Effective Radiated Power in Section III-A, Item 9.

### **Preclusion to LPFM Points**

This application has been studied to determine preclusion to LPFM points. Due to the location of the proposed amended transmitter site being outside of the 39km buffer zone around the relevant grid and being outside of the defined market area, this application does not require a Grid Test because the amended application cannot preclude any LPFM licensing opportunities in any grid.
