Subject: Amendment to KTVJ-LP STA (BSTA - 20090914AAZ)

Hello Mohammad,

Thank you for your help. I would like to amend the STA that was filed for KTVJ-LP (BSTA - 20090914AAZ). Specifically, the antenna location site elevation above mean sea level should be 488 meters. Also, the applicant will be using a pipe mast on the building. The height of the top of the mast AGL is 10 meters (4 meter building height plus 6 meter pipe height). The height of radiation center above ground is also 10 meters. No antenna structure registration is needed due to the pipe being below the minimum required for FAA and FCC registration. Please find attached a diagram of the antenna structure and antenna. I have also included the diagram below.

Best Regards,
Keith Leitch
