

ATTACHMENT 26

ENGINEER STATEMENT

I, Kevin M. Fitzgerald, did supervise the installation of the directional antenna for WMTT, Tioga, PA. The antenna was pointed at 71 degrees from true north as required by the antenna manufacturer and prescribed by our original underlying FCC Construction Permit. Enclosed as Attachment 27 is a statement from a licensed New York surveyor showing that the antenna is in fact pointed at 71 degrees from true north. All elements of this installation were done exactly as prescribed by Propagation Systems, Inc. (PSI), the antenna manufacturer. I have personally installed or supervised the installation of over 20 FM antennas for various stations in the NY, PA, MD, and OK areas and have worked as an engineer in these areas for over 18 years. I am also the Chief Engineer for this WMTT.

Sincerely,

Handwritten signature of Kevin M. Fitzgerald and the date 12/13/06.

Kevin M. Fitzgerald
President and Chief Engineer,
Europa Communications, Inc., Licensee of WMTT
