

ENGINEERING EXHIBIT

IN RESPONSE TO

FCC FORM 315 SECTION IV QUESTION 8

This exhibit has been prepared on behalf of Susquehanna Kansas City Partnership in support of its application for Commission consent to transfer of control of the licensee of FM Radio Station KFME, Garden City, MO (1051FM, LLC) from Jesscom, Inc. to Susquehanna Kansas City Partnership and shows compliance with the multiple ownership rules as set forth in Section 73.3555 of the Rules.

The attached study shows this proposed acquisition to be in compliance with § 73.3555(a)(iii) of the Commission's rules. The market "as defined" shows a total of 43¹ commercial broadcast stations with transmitters located within the combined community service contours² of FM stations KFME, KCFX and KCMO-FM and AM station KCMO. This number of stations within the market does not include other stations with transmitters located outside the combined community contours of the above stations and having overlapping community grade contours with these stations.

Figure 1 is a listing of those commercial FM stations located within the combined community service contours, and Figure 2 is a map graphically depicting the locations of same.

Figure 3 is a listing of those commercial AM stations located within the combined community service contours, and Figure 4 is a map graphically depicting the locations of these stations.

¹ Consisting of 23 AM stations and 20 FM stations.

The proposed ownership of four radio stations in a market which has between 30 and 44 commercial radio stations is well within the limit allowed under this rule³ (up to 7 stations, not more than 4 in the same service.)

December 18, 2003

Fred W Greaves Jr.
Director of Engineering
Susquehanna Radio Corp.

² 5.0 mV/m for AM and 3.16 mV/m for FM
