

Mr. Jeff Browne CE

Re: KXJZ

Dear Mr. Browne,

The addition of the 1 5/8" Heliax transmission line that will feed the KXJZ antenna and will be tucked behind the back leg of the tower that passes through the aperture of the KQEI directional antenna will have no adverse effect on the KQEI directional antenna pattern.

If you need anything else, do not hesitate to contact us.

Sincerely,

Dan Dowdle
ERI Test Range Director
