

MINOR CHANGE APPLICATION
CENTRAL FLORIDA EDUCATIONAL FOUNDATION, INC.
W240CM FM TRANSLATOR STATION
CH 241D - 96.1 MHZ - 0.019 KW
TAVARES, FLORIDA
February 2011

TECHNICAL STATEMENT

This technical statement was prepared on behalf of Central Florida Educational Foundation, Inc. ("CFEF"), licensee of FM translator station W240CM, Channel 240D, Tavares, Florida. CFEF herein proposes to make minor changes in the W240CM facilities by changing from Channel 240D to Channel 241D. The proposed W240CM facility will rebroadcast the signal of FM station WPOZ, Channel 202C1, Union Park, Florida. As the proposed W240CM 60 dBu contour is completely outside the 60 dBu contour of WPOZ, this proposal is for a non-fill-in translator. As W240CM is proposed to change to Channel 241D at its existing licensed site, there is overlap of the 60 dBu contours. Exhibit A demonstrates that W240CM on Channel 241D will not cause interference to any full service station, nor will interference be delivered to or received from any existing FM translator or LPFM station or application. This application is being submitted contingently with a minor change application for W239BS, Mount Dora, Florida.¹

The proposed W240CM antenna system will be located at its existing tower site. As such, the Federal Aviation Administration was not apprised of this proposal. The tower has been registered with the Commission and assigned Antenna Structure Registration Number 1030743.

1) CFEF is also the licensee of W239BS.

All supporting data used in the preparation of this application has been forwarded to CFEF and is available for submission to the Commission upon request.²

2) All data regarding broadcast facilities was extracted from the CBDS database on the date of the interference tabulation. We assume no liability for errors or omissions in that database which may be adverse to the requests contained herein. Only the radiofrequency exposure review of the environmental analysis was undertaken as part of this instant engineering application.
