

ENGINEERING STATEMENT

The engineering data contained herein have been prepared on behalf of FOX TELEVISION STATIONS, INC., licensee of television station WFLD-DT, Channel 31 in Chicago, Illinois, in support of this response to the FCC letter dated January 29, 2004, regarding the pending WFLD-DT maximization application (BPCDT-20010604AAX). The Commission claims that the application cannot be granted because it exceeds the maximum power and antenna height limitations in Section 73.622(f)(8) of the FCC's Rules.

The FCC has allowed stations to maximize their DTV facilities as long as the resultant coverage area of the proposal does not exceed that of the largest authorization or allotment in the market. Attached is a map upon which the 41 dBu contour of proposed WFLD-DT is plotted in relation to that of WPWR-DT, Channel 51 in Gary, Indiana (part of the Chicago DMA), as authorized in BPCDT-19991101ALA. As shown, the WFLD-DT contour is completely contained within that of the WPWR-DT authorization.

Accordingly, the WFLD-DT proposal can be granted without exceeding the coverage of the largest facility in the market.

I declare, under penalty of perjury, that the foregoing statements and attached map, which was prepared by me, are true and correct to the best of my knowledge and belief.
