

Technical Statement
Application for Construction Permit
W231AG Newburgh, NY
January, 2009

This technical statement is prepared by Charles Williamson, president of Digital Radio Broadcasting, Inc., licensee of W231AG at Newburgh, NY. This application serves three purposes: (1) Specify a different transmitter site, (2) specify a different power level and (3) specify a directional antenna.

It is proposed to relocate the translator facility to an established remote mountaintop communications site. The elevation is compliant with 74.1235 pertaining to Power Limitations since the maximum Effective Radiated Power will not exceed 10 watts.
