

SAINTE PARTNERS II, L.P.
TL K27HD - Chico, CA

EXHIBIT 6
Engineering Statement

A pending application, File No. 20030825AMQ, seeks to change channel and relocate the reference facility due to DTV displacement. That application has been questioned by the Commission with regard to potential interference to first adjacent K18A0, Oroville, California. This amendment seeks to resolve such predicted interference by lowering the proposed effective radiated powers to 40 kW at the horizon (maintaining contour overlap with the existing BNPTTL-20000804ACW authorization) and 100 kW maximum. The resulting Sec. 74.707 desired/undesired contours are shown on the attached Exhibit 6B.
