

Exhibit 38

This filing requests special temporary authority to operate DWRCX-LP, Dayton, Ohio (the "Station"), pending the Commission's consideration of the Station's pending license renewal application, which is being filed contemporaneously with the instant filing.

On October 15, 2007, the Commission canceled the license for WRCX-LP, due to the licensee's failure to properly file a renewal application by June 1, 2005. On or around October 22, 2007, Station personnel contacted Commission Staff and secured temporary oral STA to operate the Station. The licensee recently engaged counsel to assist with this matter, and contemporaneously with the instant filing, the licensee is filing a new license renewal application for the Station.

As a minority owned and operated station, DWRCX-LP has historically provided a unique voice for the minority community and other residents of Dayton, Ohio. Accordingly, the public interest warrants authority for DWRCX-LP to resume service to its community. Grant of the instant request would be consistent with Commission action in similar cases. *See, e.g.*, FCC File No. BLSTA-20070925AIO (granting STA to minority-owned AM station that filed its license renewal application four years late); FCC File No. BLSTA-20070925AIG (same).

The licensee hereby respectfully requests STA to operate DWRCX-LP for the maximum permissible period of time pending consideration of its renewal application.
