

Request For Waiver Of FCC Rules

We are requesting a waiver of the FCC rules, though, once explained, it may not necessarily require a waiver.

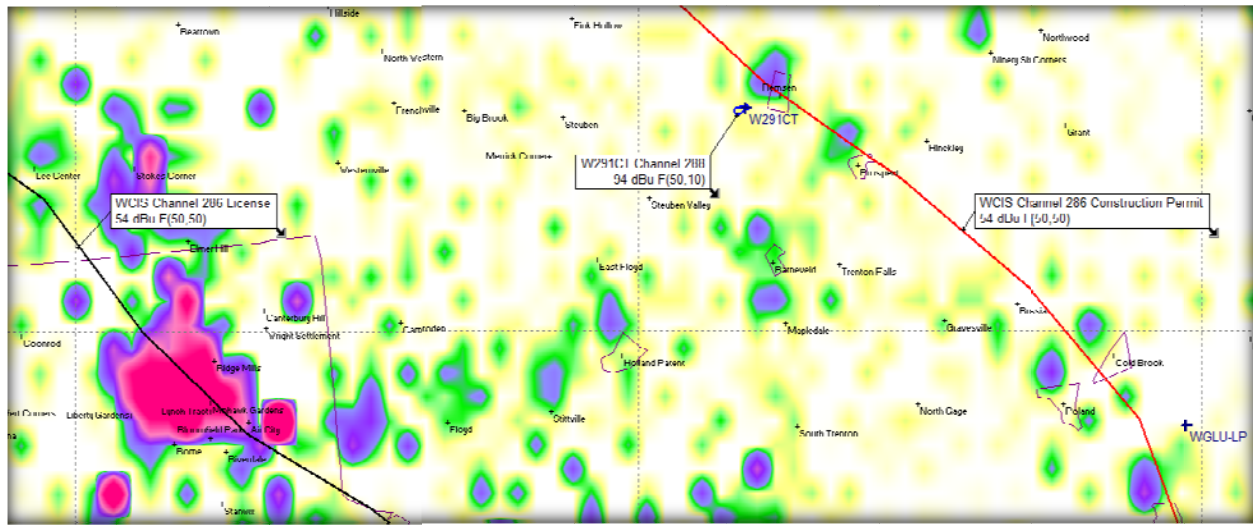

When we first applied to move W291CT in Remsen on 09/29/2014, the idea was to change channels to 288 and move it to Rome NY to better serve the public.

It was going to be placed on the east side of Rome to protect WCIS from interference.
(See Below)

However, in 05/15/2015, WCIS applied for a power increase.

Since this is only a construction permit at this time and is not actually on the air, we request the FCC allow us to move W291CT to channel 288 with the stipulation that when WCIS increases their power, we will shut down the translator immediately and apply to move to another frequency.

We feel that since this is currently only a CP and not an over-the-air station, we meet the requirements of 73.209 and therefore are grantable until such time as WCIS increases their power.
