

TECHNICAL STATEMENT  
RADIO MULTIPLE OWNERSHIP ANALYSIS  
CLEAR CHANNEL BROADCASTING LICENSES, INC.

This statement and the attached figures were prepared on behalf of Clear Channel Broadcasting Licenses, Inc. ("CCBL"), a licensee subsidiary of Clear Channel Communications, Inc. ("Clear Channel"). CCBL proposes the acquisition of KMJI(FM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

<b>Call Sign</b>	<b>City of License</b>	<b>Facilities</b>
KMJI(FM)	Ashdown, TX	Channel 227C3, 7.4 kW, 182 m
KKYR(AM)	Texarkana, AR	790 kHz, 1 kW, U, DAN
KYGL(FM)	Texarkana, AR	Channel 292C2, 50 kW, 150 m
KKYR-FM	Texarkana, TX	Channel 273C1, 100 kW, 140 m
KPWW(FM)	Hooks, TX	Channel 240C3, 11.5 kW, 148 m

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission multiple ownership rules.<sup>1</sup>

Clear Channel does not have or currently propose to have an attributable interest in any other station with a principal community coverage contour that overlaps or intersects the principal community coverage contour of KMJI(FM).

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the commonly owned stations. The predicted principal contours of KMJI(FM), KKYR(AM), KYGL(FM), KKYR-FM and KPWW(FM) are shown in Figure 1 herein. There is one "radio market" for analysis under the Commission's Rules.

Market 1 is defined by the principal community contours of KMJI(FM), KKYR(AM), KYGL(FM), KKYR-FM and KPWW(FM)

Count of Stations in Defined Markets

The number of radio stations in the "radio market" is determined by counting the operating, commercial stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject co-owned stations.

---

<sup>1</sup> See Section 73.3555 of the FCC Rules.

In Market 1, there are 32 radio stations, including the subject co-owned stations, (10 AM and 22 FM) that intersect or overlap the “radio market.”

Figure 2 is the tabulation of the other radio stations identified in each of the defined radio market. Only known licensed, operation commercial stations were employed for the study. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission’s AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 CFR 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 CFR 73.313. Terrain data was derived from the N.G.D.C. 30-second computer database for each of the FM stations using radials spaced ever 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with Section 73.3555(a) of the FCC Rules.
