

## **Exhibit 17**

### **ANSI Human Radiation Exposure Showing**

The proposed translator is operating at less than 100 watts. It is also on an AM broadcast station tower. The areas around the transmitter site are fenced and the public does not have access.

Because the proposed translator is under 100 watts, it is exempt from an further ANSI radiation exposure requirements.

In the event that workman are required to be on the tower, Lazer Broadcasting will reduce power or turn off the translator when workman are in the vicinity of the antenna.
