OAK HARBOR, OHIO
November 2006

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Urban Radio Licenses, LLC ("Urban") , licensee of WJZE, Channel 247A, Oak Harbor, Ohio. Urban also holds an outstanding permit which authorizes minor changes in the facilities of WJZE (BPH-20050617AAU). Urban herein proposes to modify the outstanding permit by lowering the antenna at the authorized permit site and increasing power. No other changes are proposed.

Urban is still proposing to locate the antenna system for WJZE on an existing tower. As such, the Federal Aviation Administration was not appraised of this proposal. The tower on which the WJZE antenna is to be mounted has been registered with the FCC and assigned Antenna Structure Registration Number 1015474. Using the Commission's contour propagation curves, the 70 dBu contour of the proposed WJZE from the requested site does not encompass Oak Harbor. However, using an alternate propagation model, the community of Oak Harbor does receive the requisite city grade coverage. See Exhibit A for details.

Further, at the site proposed in this application, Channel 247A does not meet the Commission's minimum distance separation requirements to one other FM facility. As such,

processing pursuant to §73.215 is requested. Exhibit B is a demonstration that this proposal complies with §73.215 of the rules. All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to the Urban and is available to the Commission upon request.¹

1) The undersigned is certifying only RF exposure compliance for its part of the environmental review.
