June 2009**

EXHIBIT A

Clear Allocation Reference Site

This application seeks to change the community of license of WKBB from West Point, Mississippi to Mantee, Mississippi. As the proposed implementation site is requesting contour protection processing under §73.215, a designated allocation reference site has been identified.

As denoted on Exhibit A1, from the proposed allocation reference site, Channel 265C2 meets the Commission's minimum distance separation requirements to all licensed, proposed or applied for facilities with the exception of the licensed WKBB. From the proposed allocation reference site, a maximum Class C2 would place a theoretical 70 dBu non-terrain influenced signal over 100% of the community of Mantee, Mississippi, as shown on Exhibit A2. Further, as shown on Exhibit A3, the proposed site is not located offshore or on airport property and is, therefore, suitable for tower construction. Therefore, this proposal meets the Commission's allocation criteria.
