

Exhibit E-18

The proposed facility should be exempt from environmental processing. This application seeks to increase the daytime transmitter power and correct the coordinates for both the daytime and nighttime operations. There are no proposed physical changes to be made to the elements of the array.

Each of the towers in the array is currently fenced at an appropriate distance. The fences about the towers will be maintained to prevent casual access by persons at the site. In addition, applicable signs have been posted warning persons of the hazards at the site. The applicant will coordinate with other users of the site as necessary to prevent worker from being exposed to levels of non-ionizing radiation which may exceed the applicable safety standards.
