To Whom It May Concern:

Newport Television, LLC (dba as KMTR-TV) has reviewed the proposal of Oregon Public Broadcasting for digital displacement of K17AA to operate on Ch23. The additional interference predicted to KMCB is minimal, and given that K17AA and KMCB will operate from the same tower site and with the same directional pattern, we do not expect any actual interference to occur. We therefore consent to grant the K17AA application.

If any technical issue affecting the KMCB broadcast signal develops during this process Oregon Public Broadcasting agrees to work diligently with KMTR-TV to resolve the issue.

Sincerely,

A handwritten signature in cursive script, appearing to read "Cambra Ward".

Cambra Ward

Vice President and General Manager
