Asheville, NC 28804

Dear Ms. Watts,

On January 28, 2002 we verified the orientation of a newly installed FM antenna at the tower site on High Top Mountain. The desired orientation is shown on the Installation Detail as 90.6161 Degrees True. The final orientation of the antenna is as follows:

Upper element - 90.0494 Degrees True
Lower element - 91.1030 Degrees True

Both of these values are less than 0.5 Degrees away from the desired orientation.

Sincerely,

W. Dennis Campbell III, P.L.S.
L-2993
