Hello,

I tried change the tower long and latitude for to right one on the originals. But it would not let me. So I refile with the right long and lat.

If you can tell me how to change the originals I would. But they will not let me change them.

John Bennett
Chief Engineer for
KTTW Fox 7 and KTTM Fox 12

The two subject applications were filed as new flashcut proposals. The stations for these two applications already has new flashcut applications pending. Therefore, the subject applications should be dismissed and filed as amendments to their respective pending flashcut application.
