

MINOR CHANGE APPLICATION
CUMULUS LICENSING LLC
KCDD (FM) RADIO STATION
CH 279C - 103.7 MHZ - 100.0 KW
HAMLIN, TEXAS
June 2012

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Cumulus Licensing LLC ("Cumulus"), licensee of station KCDD, Channel 279C0, Hamlin, Texas. Cumulus herein proposes to upgrade KCDD to Channel 279C, using the one-step application procedure, as outlined in MB Docket #05-210 (released November 29, 2006). Cumulus proposes to implement this upgrade at the licensed KCDD site.¹

Cumulus is proposing to implement this upgrade at the existing KCDD tower site. However, since an increase in height of the tower is necessary, the Federal Aviation Administration was apprised of this proposal.² A Determination of No Hazard was issued and the tower was registered with the FCC and assigned Antenna Structure Registration Number 1054597.

At the proposed/existing KCDD site, Channel 279C does not meet the Commission's minimum distance separation requirements to one other station, which is addressed pursuant to §73.215 of the rules (Exhibit B).

-
- 1) The proposed facilities are the same as authorized in BPH-20090126AEB.
 - 2) A Determination of No Hazard was previously issued for the increase in height of the KCDD tower. This determination, ASN: 2009-ASW-187-OE, expires on July 25, 2012. A new determination will be requested from the FAA and ASRN 1054597 will be modified to reflect that new determination.

All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to Cumulus and is available to the Commission upon request.³

3) The undersigned has evaluated only the radio frequency radiation exposure limits of this proposal. All data regarding broadcast facilities was extracted from the CDBS database on the date of this instant application. We assume no liability for errors or omissions in that database that may be adverse to the requests contained herein.
