Video Division, LPTV Branch
Federal Communications Commission

Dear Sir:

Interference with an application designated AP417 was identified during the coverage and interference analysis of K47GR. Upon investigation of the facts surrounding this particular application, I called the FCC LPTV branch and spoke to Hossein Hashemzadah on 8-15-02. The application appeared to be dormant with no resolution for a very long period of time and I asked about the possibility of it being dismissed. Further conversation with Hossein resulted in his recommendation to file the application for K47GR and to ignore the application designated AP417 in this particular case. Therefore, even though this application may indicate interference with AP417, I ask that K47GR still be granted the power upgrade and that the AP417 application be resolved in a timely manner or be dismissed.

Sincerely,

Greg Best

President
