

# *Educational Statement*

Machine Project is a non-profit media arts corporation under section 501 (c)(3) of the IRS code. We host two free-of-charge art-related events in our storefront every week, as well as classes teaching a variety of subjects, from computer programming to pickling. By sponsoring live exhibitions and workshops, we hope to foster a creative community.

Machine Project has hosted a variety of exhibitions and workshops to educate Echo Park, Greater Los Angeles and the general public. Our programming has covered topics such as arts, technology, and culture across a wide spectrum of media.

### MACHINE INTERVIEWS

<http://machineproject.com/projects/interviews/>

Machine Project intends to utilize an FM radio station to reach out to a new audience within and outside our community. Tuning into our station would provide listeners with in-depth interviews with contemporary artists, live performances, as well as broadcasting our workshops to a wider audience - at no cost to them. The broadcast would provide Machine Project with a new way of providing Los Angeles with an in-depth artistic education.
