

[Exhibit 13]

Non-Interference Compliance

Regarding Facility id 149348

Channel 221

Description of Exhibit 13 Contents

This exhibit demonstrates that the proposed facility complies with contour overlap and interference protection provisions in all of the applicable rule sections and that this application for a construction permit is in full compliance with 47 C.F.R. § 74.1204.

Let it be noted that should any actual real world interference occur, the applicant acknowledges that it will promptly suspend operation of this translator in accordance with 47 C.F.R. § 74.1203.

Page 2 of this exhibit contains the tabulated data from the interference analysis, which shows all stations whose protected contours come within 50 km of the 34 dB μ F(50,10) contour of the proposed translator. These tabulated values were calculated using data from the FCC's CDBS files and 30 arc second terrain data. The column labeled "Adj" shows the number of channels difference between the entry and the proposed translator. The column labeled "Dist" shows the distance in km. The column labeled "Overlap" shows the area of contour overlap in square kilometers.

Page 3 of this exhibit contains a map of the proposed 60 dB μ F(50,50), the 100dB μ F(50,10) interfering contour, the 60 dB μ contour of the 3rd adjacent fill-in FM station WKKZ and the location of the city of license, Dublin, for fill-in WKKZ.

Note: The interfering contour of proposed W274BD lies outside the city of license.
