Re: WOUF(FM), Beulah, Michigan  
Facility Identification Number: 57414  
Roy E. Henderson  
Special Temporary Authorization

Dear Mr. Hannel:

This is in reference to the request filed April 25, 2008, on behalf of Roy E. Henderson ("REH"). REH requests extension of the special temporary authority ("STA") granted on October 26, 2007, to operate Station WOUF with temporary facilities.<sup>1</sup> In support of the request, REH states that its Application BMPH-20080304ACH, for relocation of the transmitter, remains pending.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that Construction Permit BMPH-20080304ACH was granted on May 15, 2008. Thus, the licensee has made substantial progress toward restoration of licensed operation, and extension of STA is warranted to allow time for construction of the newly authorized facilities.

---

<sup>1</sup> WOUF is licensed to Beulah, Michigan, for operation on Channel 221A (92.1 MHz) with effective radiated power ("ERP") of 1.6 kilowatts (H&V) and antenna height above average terrain ("HAAT") of 183 meters. Construction Permit BMPH-20080304ACH authorizes a change in frequency and class to Channel 222C2 (92.3 MHz), relocation of the transmitter and operation with ERP of 50 kilowatts (Max-DA, H&V) and HAAT of 136 meters.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WOUF may continue to operate with the following facilities:

Geographic coordinates:	44° 36' 38" N, 86° 9' 38" W (NAD 1927)
Channel	222 (92.3 MHz)
Effective radiated power:	0.4 kilowatt (H&V)
Antenna height:	
above ground:	15 meters
above mean sea level:	277 meters
Above average terrain:	67 meters

REH must notify the Commission when licensed operation is restored. REH must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **May 14, 2009**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with the first name "Charles" being the most prominent part.

Charles N. Miller, Engineer
